Sarnia: Summary Demographic Profile

The City of Sarnia has a population of 71,600 people. It is the urban centre for Lambton County. Between 2011 and 2016, the population declined by 1.1 per cent. The population is also aging. The average age in the city in 2016 was 43.9 considerably higher than both the provincial and national population. The City's population density per square kilometre is 434 – similar to many small and mid-sized urban centers across the country.

One of the challenges facing the community has been the lack of inward migration. While the 2016 data is not available until November, the County level data is instructive. In the most recent five-year period, there were an average of 149 immigrants settling in the County down 15 from the previous five-year period and 39 per cent compared to the previous decade.

Table 1 provides the summary demographic information for 2016.

Table 2 shows the income profile for the Sarnia Census Agglomeration (CA). This profile is taken from tax filer data for 2014 and reflects the amounts people claim on their tax forms. On average, people in the Sarnia CA earn slightly more than their counterparts across Ontario and Canada. However, average employment income is two per cent below the provincial level and on par with the Country as a whole. The number of persons declaring employment income over the past five years is down by two per cent while rising strongly across the Province and Country.

Sarnia has a lower share of persons reporting self-employment income compared to the Province and the Country as a whole. There has been a 14 per cent rise in the number of persons reporting CPP over the past five years but that is below the growth rates in Ontario and Canada overall. Workers' compensation usage is declining steeply. The number of persons declaring social assistance income is on the rise. It is below the growth rate across Ontario but higher than the increase across the Country. On a relative basis, the Sarnia CA has 12 per cent more people receiving social assistance when compared to the Province as a whole and 26 per cent more when compared to Canada.

The 2011 National Household Survey provides additional insight into the income profile for Sarnia¹. From the survey, the average cost of dwellings (housing) was \$179,266 in the city or 40 per cent below the Ontario average. The share of owner households spending 30 per cent or more on shelter costs in Sarnia was well below both the provincial and national levels.

Sarnia Industrial Profile: Introduction

As of December 2016, there were over 5,000 business locations (hereafter referred to as firms or establishments) in the City of Sarnia of which over 2,000 establishments had employees. These are establishments that are registered and providing payroll and other information to the Canada Revenue Agency (CRA). The data comes from Statistics Canada's Canadian Business Patterns database which provides information on the establishments by detailed industry (NAICS) and employment size.

The industry profiles below provide a summary of the key sectors and the number of firms by employment size. In addition, the economic structure is compared to Ontario as a whole to provide a first level insight into firm intensity and size. The tables show the number of firms by sector adjusted for population size (per 10,000 population) to allow for a meaningful comparison to the provincial economy. For example, there are 502 businesses in Sarnia active in the retail trade sector (NAICS 44-45). Compared to Ontario, there are a similar number of retail businesses (adjusted for population size) in Sarnia and the average size of a retail business is slightly larger (10 per cent larger displayed as 1.1 in the table).

The data is presented at a detailed sector level to help provide an initial assessment of areas in which the Sarnia has a very high concentration of firms or a low concentration. See Appendix B for a more detailed description of the source and methodology.

Table 4 compares the Sarnia economic profile to the province as a whole by firm concentration and average firm size. Appendix A provides detailed tables listing the number of firms in each industry group, the size by employment range and the comparison to the Ontario economy as a whole.

Initial Observations:

- Overall, the Sarnia economy has fewer firms (adjusted for population size) but the average firm size
 is larger when compared to the province as a whole.
- Sarnia's manufacturing sector is relatively smaller than the Province but it features a high
 concentration of petroleum and chemical manufacturing firms and an above average share of metal
 product manufacturers.
- The city's retail trade sector is similar in size and scope relative to the provincial economy. There is a
 higher concentration of firms in a few areas including sporting goods/hobby/book/music stores and
 gas stations. The City has a smaller wholesale trade sector but has a high concentration of petroleum
 product wholesale firms.
- Sarnia has fewer professional services firms but the average firm size is larger. The City has an
 interesting cluster of engineering services firms. There are 84 firms or about 60 per cent more relative
 to the provincial economy and the average firm size is more than double (as measured by average
 employment). There are more drafting services firms, testing laboratories and industrial design
 services relative to the province.
- Sarnia's ICT sector is below average in both firm intensity and firm size.
- As measured by establishment intensity and size, Sarnia's health care sector is similar to the province as a whole. There is a high concentration of chiropractors, dentists and optometrists (based on registered firms) as well as residential care and nursing home facilities.
- The city's tourism sector is average sized relative to the province as a whole but there are a few subsectors with high concentration including drinking places, horse race tracks and golf courses.

91 - Public administration	4	1	1	1	0	0	1	106	0.5	0.9

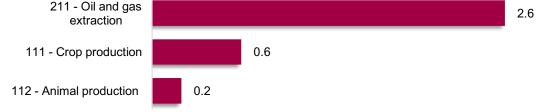

Primary Industries

As an urban centre, Sarnia has a fairly low concentration of establishments in the agriculture sector. There are 31 soybean farming establishments and seven horse production establishments based in the City.

Sarnia is home to 13 firms in the oil and gas sector. Most firms are small but there are two with at least 50 employees. Three of the firms are registered in the oil and gas extraction sector and nine provide services to oil and gas extraction.

Figure 1: Primary sectors - by concentration of firms relative to the Ontario economy (Ontario = 1.0)

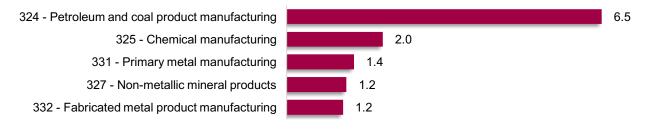

Construction and Manufacturing

There are 501 firms in the Sarnia construction sector of which 228 have formal employment. Construction firms tend to be larger in Sarnia; with an average employment level of twice the national construction sector. Sarnia has an above average concentration of firms is NAICS 2371 - Utility system construction. There are more than two times as many firms compared to the Ontario economy, adjusted for population size. The average firm is three times larger by total employment).

Overall, Sarnia has a lower concentration of manufacturing firms relative to the Ontario economy but the average size of a manufacturing firm is 20 per cent larger by employment. Sarnia is home to a cluster of firms in petroleum and chemical manufacturing (20 firms in total) of which five have more than 100 employees. The City also has higher concentrations of manufacturing firms in NAICS 327 - Non-metallic mineral products, NAICS 331 - Primary metal manufacturing and NAICS 332 - Fabricated metal product manufacturing.

Figure 2: Manufacturing sub-sectors with a high concentration of firms relative to the Ontario economy (Ontario = 1.0)

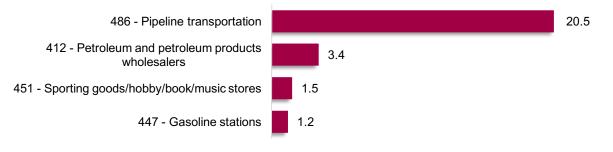

Trade and Transportation

Sarnia has 502 firms in the retail trade sector, 154 in the wholesale trade sector and 159 in the transportation and warehousing sector. The community has lower concentration of firms in wholesale trade and transportation relative to the Ontario economy as a whole. At the sub-sector level, there are several sectors that stand out. Sarnia has six pipeline transportation firms which is 20 times the provincial level adjusted for population size. The community has eight firms in petroleum and petroleum products wholesaling which is more than three times the provincial level. There are 50 per cent more firms relative to the Ontario economy in NAICS 451 - Sporting goods/hobby/book/music stores and 20 per cent more in NAICS 447 - Gasoline stations.

Figure 3: Sub-sectors with a high concentration of firms relative to the Ontario economy (Ontario = 1.0)

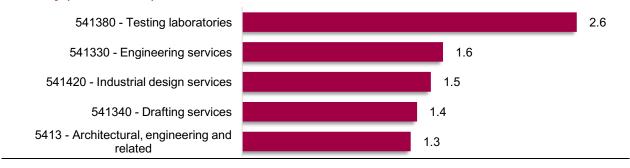

Information, Finance and Professional Services

Urban centers tend to be hubs for regional services activity. Sarnia has a lower concentration of firms in finance and insurance as well as professional services than the provincial average. There are relatively fewer firms in legal services, accounting services and far fewer in IT related sub-sectors. There are three software development firms, two in data processing and 47 in NAICS 5415 - Computer systems design and related. There are 80 per cent fewer firms in NAICS 5415 compared to the provincial economy (adjusted for population size).

There is an interesting cluster of firms in the engineering services sector. There are 84 firms in engineering services or 60 per cent more than Ontario as a whole and, on average, the firms are more than twice as large by average employment size. There are 10 testing laboratories, five drafting services firms and five industrial design firms. While the number of R&D firms is relatively small (six in total), there is one large entity bringing the average employment size in the sector to six times larger than the provincial R&D sector.

Figure 4: Engineering and R&D sectors with a high concentration of firms relative to the Ontario economy (Ontario = 1.0)

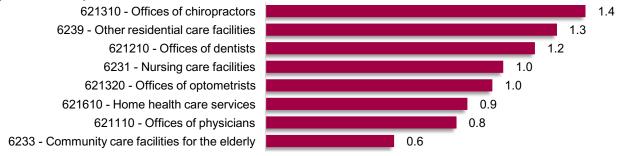

Education, Health Care and Public Administration

There are 42 post-secondary education and training establishments in Sarnia with only one having more than 100 employees. In addition to the public community college there are two firms in NAICS 611420 - Computer training; three in NAICS 611430 - Professional and management development training; four in NAICS 611510 - Technical and trade schools; four in NAICS 611610 - Fine arts schools and 15 in NAICS 611620 - Athletic instruction.

Regarding the health care sector the establishment and employment footprint is similar to the provincial level. There is a higher concentration of several specialty health care occupations (NAICS 621310 - Offices of chiropractors, NAICS 621210 - Offices of dentists and NAICS 621320 - Offices of optometrists) as well as nursing home and residential care facilities.

There are only three establishments in NAICS 6215 - Medical and diagnostic laboratories and the average employment level is much lower than the provincial level for this sector. There are six firms in NAICS 6243 - Vocational rehabilitation services; 30 per cent more than the province (adjusted for population size) and nearly three times as large (as measured by average employment). There are four establishments in public administration.

Figure 5: Sectors with a high concentration of firms relative to the Ontario economy (Ontario = 1.0)

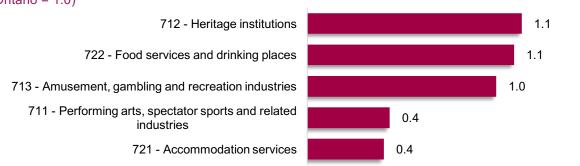

Tourism

Sarnia is home to 292 firms in the two main tourism sectors: NAICS 71 - Arts, entertainment and recreation and NAICS 72 - Accommodation and food services. The City has a slightly higher concentration of food services and drinking establishments (2.7 times as many establishments in NAICS 722410 - Drinking places/alcoholic beverages compared to Ontario adjusted for population size). But, the City has a relatively low concentration of firms in NAICS 721 Accommodation services and the average size of firm is well below the provincial level.

There are several entertainment related sectors in Sarina that have an above average concentration of firms. There are five establishments in NAICS 711213 - Horse race tracks – nearly twice as many as the province as a whole and there are seven establishments in NAICS 713910 - Golf courses and country clubs; 50 per cent more than the Ontario average.

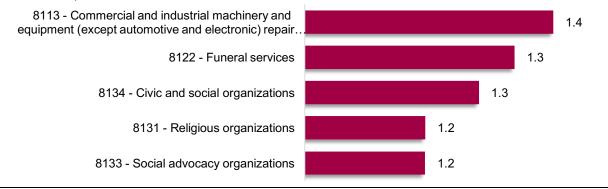

Figure 6: Tourism-related sectors – firm concentration relative to the Ontario economy (Ontario = 1.0)

Other Sectors

Sarnia is home nearly 400 firms in the other services sector. There are 72 firms in the automotive repair and maintenance sector but adjusted for population size there are 20 per cent fewer firms in this sector. Figure 7 shows the main sub-sectors where Sarnia has a higher than average concentration of firms.

Figure 7: Personal services sectors – firm concentration relative to the Ontario economy (Ontario = 1.0)

Appendix B: Source and Methodology

The data in this report is taken from the December 2016 edition of Canadian Business Patterns which is published by Statistics Canada. Canadian business patterns data provide counts of active locations by industry classification and employment size categories for Canada and the provinces/territories. Data are compiled from the Business Register, which is a repository of information on the Canadian business population.

In order to be included in this database, a business must have been assigned a NAICS code and meet at least one of the following criteria: be an employer (i.e., have employees), be a corporate tax filer (T2), be a GST registrant with sales greater than \$0, file an individual tax return (T1) showing business revenue greater than \$0 and for which we can match the Business Number (BN) to the Social Insurance Number (SIN) and/or show evidence (obtained via profiling activities) of size.

In order to compare the community's economic structure to the province as a whole, the data was standardized in two ways:

The number of firms was adjusted based on population size and then compared to the provincial economy. A number greater than 1.0 means a higher concentration of firms (relative to population size).

The average size of firm by sector was estimated by taking the mid-point employment level for each employment range (1-4, 5-9, etc.) and deriving the average for all firms.
